Simple and Effective Cybersecurity for Small Businesses

Enterprise-Grade Protection and Performance without Complexity or Cost

Your small business needs technology to work together with minimal effort. You also require simple and effective security that you can trust. Fortinet makes it easy to consolidate and centralize the management of FortiGate Next-Generation Firewalls (NGFWs), switches, access points, and 5G/LTE gateways via an integrated cloud management service.

FortiGate NGFWs: The Most Deployed and Trusted Network Firewalls in the World

FortiGate is a quantum-safe-ready firewall that delivers unparalleled protection and performance to safeguard your mission-critical networks—without increasing complexity or expense. As a cornerstone of the Fortinet Security Fabric, FortiGate provides out-of-the-box integration and easy automation across Fortinet products. You can simplify the deployment, monitoring, and management of all Fortinet products connected to your LAN and WLAN from a single platform, securing your business and employees.

Exploitation of vulnerabilities became the most common initial access vector for breaches in 2026, accounting for 31% of breaches—up significantly from 20% in 2025.[1]

FortiGuard Services: AI-Powered Protection Stops Ever-Evolving Cyberthreats

FortiGuard AI-Powered Security Services bundles offer comprehensive protection for applications, content, web services, devices, and users. They intelligently assess risks and counter known and unknown threats to ensure rapid, real-time detection and response, regardless of where they occur, via a context-aware, consistent security policy for users and applications.

FortiManagement Cloud: Simplified Management and Analytics

FortiManagement Cloud is a cloud-based service that simplifies network operations by providing centralized management for FortiGates and downstream connected devices, such as FortiSwitch, FortiAP, and FortiExtender. With enterprise-grade visibility and analytics included, FortiGate Cloud becomes your one-stop shop for efficiently managing IT devices and effectively reducing cyber risk.

FortiConverter Service: Migration to FortiGate Made Easy

The FortiConverter Service accelerates your transition from legacy firewalls to FortiGate NGFWs. The service employs best practices by utilizing proven methodologies and validation to minimize human error, thereby limiting any negative impacts on your business operations.
